Mission
Building a Society with Cyber Law Awareness

"He is a Wise Man who Learns from Others "

Mr Rajesh has just finished arguing one of the most prestigious cases of his budding legal career and is confident that the case is almost sued up in his favour.

…….Suddenly the opposition has sprung a surprise…. An e-mail …and some provisions of Information Technology Act… Section 4 of ITA 2000 or Section 65 (B) of Indian Evidence Act…

… Rajesh feels that the ground under his feet is giving away. ..

Surely, You do not want to be in Rajesh's Shoes….

What is quality if in every one of your processes you are breaking law?

If a driver is regularly driving on the wrong side of the road can you call him a quality driver because he has a good steering control ?

If a Bank is conducting all its customer transactions on the basis of oral exchange of instructions with customers, can it qualify for Six Sigma?

If your Company does not know Can Spam Act or Data Protection Laws or Patent Laws, can you survive in the competitive global IT market?

……inconvenient questions that even major IT Companies cannot answer conclusively.

Surely, you want your Company to be Cyber Law Compliant besides being a ISO/CMM/Six Sigma Certified.

" Nasscom-IDC Survey Says…Information Security Experts get 200 % higher wages"…

"Industry observers point out that security is one of the most sought after and best-paid career. ... in the US, an entry-level IS professional can command a salary of $75-80,000 per annum, with the one at the higher-end earning somewhere around $1,50,000. In India, an IS aware professional (say a network administrator), will earn close to $35-40,000, with the top rung earning around $1,20,000 per annum."... Express Computers

More importantly, .." Job Opportunities for IS aware professionals is around 5 times a normal IT professional"

Surely, You want to be a Hot Professional !

" Business without E-Business is a thing of the past.. Auditor without Cyber Law Expertise too will soon be left in the past"

If "There is No Business without E-Business", can there be any Audit without Computer Audit. There are many Chartered Accountants who have realized this and started acquiring Computer audit skills. But Computer Audit without Cyber Law Expertise is like driving in the City without knowing what is a traffic light.

Surely, You would like to the "Informed Auditor" besides being the "Information System Auditor"

If any of the situations described above seem to familiar to you, then it is the sure sign that you need to visit Cyber Law College and find out what it can do for you and your employees.

New Career Opportunities Open Up

If you are already a qualified lawyer practicing law, it is time that you realize that in the coming days there is no dispute which does not have a Cyber Law angle. Before it is too late you need to acquire the nuances of Cyber Law. Your legal career is bound to prosper.

If you are a technology student aspiring to make a career in IT, remember that Information Security is the emerging oasis of opportunity. But to reap the benefits of the emerging opportunities you should remember that " Information Security is Complete only with "Techno Legal Security" and not "Technical Security" alone. With Information Asset Insurance round the corner, Techno Legal Security would be the security bench mark for better insurance premia. Technology experts therefore have to quickly equip themselves with Cyber Law Knowledge to become "Techno Legal Cyber Security Experts".

Chartered Accountants and Company Secretaries have new career opportunities coming up in the areas of Computer System Security Audit and Cyber Law Compliance Audit. Acquiring Cyber Law Expertise is the first inevitable step to reach the throne of a "Leading Computer Security Auditor" or a " Leading Corporate Legal Consultant".

Thus whether you are a Lawyer or a Non Lawyer, an MBA or a BE, a CA or an ICS, Cyber Law expertise is the cutting edge qualification for the competitive world.

Knowledge is Power….. In a Digital Society, knowledge of Cyber Laws is the Power that can open new avenues of prosperity

Naavi.. A Man with A Mission

When we think of Cyber Laws in India, one name that strikes our mind is that of Naavi, a man with a mission….to create Cyber Law Awareness across the different segments of the society and founder of Cyber Law College

Naavi is the popular name of Na.Vijayashankar, born in Mysore.

Naavi wrote what turned out to be the first book on Cyber Laws in India titled "Cyber Laws for Every Netizen in India" in 1999. In 2000 he started Cyber Law College as a virtual education center for Cyber Law Education. During the next few years, Naavi published the first e-book on Cyber Laws in India titled "Cyber Laws in India…ITA-2000 and beyond" and also a book in Kannada titled "ಅಂತರ್ಜಾಲ ಅಪರಾಧಗಳು" (Cyber Crimes). His book "CyLawCom…Corporate Mantra for the Digital Era" was directed at introducing the concept of Cyber Law Compliance in the industry. His latest book "Cyber Laws Demystified" is another attempt by Naavi to take the Cyber Law knowledge to lay persons.

Thus Naavi's efforts at Cyber Law Education started in 1998, making him the pioneer of Cyber Law Education in the Country.
